Education

Thapar Institute of Engineering and Technology, Patiala, Punjab, India

2020-2024

Bachelor of Engineering — Computer Engineering GPA: 8.22/10.0

Experience

MAQ Software

August 2024-Present

Software Engineer 1

Noida, India

- Built scalable, **responsive web applications** using **React, JavaScript, TypeScript, and Node.js**, applying **OO design patterns** and modular component architecture to deliver cross-browser compatible UIs with 30% faster load times.
- Developed and maintained **reusable front-end components** with **React and HTML/CSS**, implementing **responsive/adaptive design** principles to ensure seamless user experiences across devices, web-views, and browsers.
- Designed and exposed **RESTful APIs** using Python and **Node.js/Express**, streamlining client-server integrations and enabling efficient data flow between front-end and backend services.
- Collaborated in **Agile sprints** using Azure DevOps, leveraging **CI/CD pipelines, Git versioning**, and automated testing to maintain deployment stability, code quality, and **backwards compatibility**.

MAQ Software

January 2024-July 2024

Associate Software Engineer

Noida, India

- Engineered a modular, role-based Power App solution with **form-driven workflows and logic-based routing**, leading to a 30% faster resolution time for service requests.
- Integrated **JavaScript and Xrm JS** into Power Apps to enable **client-side validations, conditional rendering**, and API-based data fetching for an enhanced, intuitive user interface.
- Orchestrated backend workflows using Power Automate and **REST APIs** to enable live status tracking, automatic escalation, and reduce manual dependencies by 40%.

Talent Serve

June 2023-July 2023

Software Engineer Intern

Mumbai, India

- Constructed a secure internal **web application using Django** and PostgreSQL to collect employee mental health feedback anonymously, increasing participation by 30%.
- Implemented **JWT-based authentication** with role-based access control, ensuring secure handling of sensitive data and aligning with organizational privacy standards.
- Created a **responsive frontend using React and Tailwind CSS**, optimizing accessibility across devices and achieving 95% user satisfaction.

Projects

- [Video-GPT](#) | *LlamaIndex, Langchain, SQLAlchemy, React, FastAPI*
Implemented a subtitle indexing system using GPT Tree Index in Python, reducing response times to video-related questions by 45%. Utilized NLP models to query the index and generate accurate responses. Leveraged **FastAPI to build RESTful APIs**, increasing API response efficiency by 40%, and instituted a persistent database for caching future queries.
- [GreenChoice](#) | *React, Express.JS, MongoDB, NodeJS, API Integration*
Built a full-stack e-commerce platform promoting eco-friendly decisions using **React, Node.js, and Express**. Designed and implemented **responsive UI components** improving user retention by 40%. Integrated ML models via REST APIs for personalized product recommendations, increasing eco-friendly selections by 35%.
- Ad Analytics Dashboard** | *React, TypeScript, Node.js, REST APIs, Chart.js*
Designed and developed a **responsive, cross-browser analytics dashboard** for visualizing advertising campaign metrics (CTR, ROAS, impressions). Built **reusable React components** with TypeScript, implemented **client-side and server-side rendering** strategies, and delivered functional prototypes enabling stakeholders to track campaign performance in real time.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C/C++, HTML, CSS

Frameworks/Tools: React, Node.js, Express, Angular, Bootstrap, Django, Spring Boot, Tailwind CSS, Git, Docker, Postman, Responsive/Adaptive Design

Cloud & DevOps: Azure, Azure Data Factory, Azure DevOps, REST APIs, CI/CD, Power BI

Databases/Others: MySQL, PostgreSQL, MongoDB, Firebase, DBMS, ETL, Pandas, Langchain, LLMs, OOP, Data Structures & Algorithms

Leadership and Achievements

- Creative Computing Society:** Strategically led and mentored a team of 50 members, orchestrating their learning journey and overseeing the successful implementation of complex technical concepts in a high-impact Technical Bootcamp.
- Certifications:** [Microsoft Certified: Fabric Data Analyst Associate \(DP-600\)](#), [Microsoft Certified: Fabric Data Engineer Associate](#), [SnowPro Core Certification](#), ML certified under P.S. Rana – Thapar Summer School of Machine Learning, solved 450+ LeetCode problems.
- Hackathons:** Winner, BlackRock Hackathon – Configured a real-time risk management system.
